BRILLIANT BUILDINGS

We will construct and refurbish buildings fit for current and future generations

All our new buildings and major refurbishments will achieve net zero operational carbon

All our new buildings and major refurbishments will be future-climate ready and optimise user health and wellbeing

At the end of 2040, all our buildings and major refurbishments will be delivered with net zero embodied carbon

By the end of 2040, our supply chain will achieve net zero operational carbon

Creating high-quality sustainable buildings fit for the future

ENSURING SUSTAINABILITY IN EVERY BUILDING, WE COMMIT TO:

- **Effective communication** with customers to help them understand where there is opportunity for further sustainability features
- Taking our approach to the next level, **minimising impact** on the environment
- Maximising **sustainability** whilst ensuring **cost efficiencies**
- Working with **all stakeholders** to provide the **best service** for a sustainable building

Supporting your requirements

We work with our customers to deliver buildings which are **resilient** to the impacts of our changing climate, **conserve natural resources** and specify **low energy-intensive technologies**. We want all of our projects to help our customers limit their carbon emissions and the cost of ownership, whilst also improving people's **health and wellbeing**. Our dedicated sustainability team will work with you to find **optimal solutions** to improving the sustainability of the building, and to specific **accreditations**.
